Name

rdmarkerset — Tool for mass altering Rivendell audio cut markers

Synopsis

rdmarkerset [*OPTIONS*]

Description

rdmarkerset(8) is a command-line tool for setting or altering audio cut markers in the Rivendell Radio Automation System.

Options

--all-groups

Apply marker changes to ALL audio cuts in the Library. Use of this option is mutually exclusive with the **--group** option, below. Use with caution!

--auto-segue=*level*

Set the Segue Start marker on the specified cuts to *level* dBFS and the Segue End marker to the position of the End marker. Specifying a **0** for *level* will remove the segue markers. Default action is to leave the segue markers unaltered.

--auto-trim=*level*

Auto-trim the specified cuts to *level* dBFS. Specifying a **0** for *level* will remove auto-trim --i.e. move the Start and End markers to the extreme start and end of the audio data. Default action is to leave the Start and End markers unaltered.

--group=*group*

Apply marker changes to the audio cuts belonging to *group*. This option may be given multiple times. Use of this option is mutually exclusive with the **--all-groups** option, above.

--verbose

Print messages to STDOUT describing progress.
